

## *S/V OBERON*

*Additional informations for the main sail construction.*

*-Double reinforced slides at head of the sail:*

*-Dog bones at each reef point, tack side:*

*-Reinforced slug at the clew point:*

*-Stainless steel slide above each reef point and long webbing strap at each reef points*

*- "Rutgerson 1590" batten holder and cars.*

*-All cringle, pressed eyes, eyelets and rings in 316 stainless steel.*

*-All straps and webbing made of polyester.*

*-Below, dimensions and position of the battens, and reef points from middle of the tack cringle.*

*-Note that for the battens, I give you a shorter measurement than the existing one (about 4 cm) so I can recut my battens if necessary but not make them longer...*

*-If the roach of the sail is slightly different than the existing one, NO PROBLEM!*

*-The same for the positioning of the reef, more or less 5cm is no problem*
